DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The Title:

“ and equipment” should be deleted.

The Specification:

“1999,” (Spec. page 1, line 4) should be changed to: --1999, now US Patent 6,219,907,--.

The drawings:

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figs. 1-14 having unacceptable margins and lines, number, letter and reference characters are not uniformly thick, well defined, clean, plain and legible. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The Claims:

Non-elected claims 12-14 should be canceled.

Note: Applicant is requested in correcting any additional errors if which they may become aware in the claims and specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 3729

2. The following is a statement of reasons for the indication of allowable subject matter: the prior references alone or in combination do not teach or suggest the claimed hand-held apparatus for install a cover around conductor wire as claim by the present application. In particular, the combination limitations of: "a first and a second set of space-apart rollers rotationally mounted to the frame first and second sides to form a guide assembly" are lacking from the prior art teachings.
